

VI - Workshop on Renewable Energy Sources and Nanotechnology

In honor of Professor
Edson Ortiz de Matos

December 12th to 16th, 2016 – Belém/PA

<http://wren2016.ufpa.br> & **Facebook: WREN UFPA**

The Workshop on Renewable Energy Sources and Nanotechnology (WREN) will gather experts from the various fields of energy science and engineering, and provide a platform for discussing their social and global impacts. The workshop will cover pertinent topics ranging from latest trends in renewable energy to novel materials for energy harvesting, storage and conversion. All participants will be exposed to the latest advances in sustainable-energy technologies, such as fuel cells, photovoltaics, CO₂ photoreduction and hydrogen production. All the themes will be inline with the current research activities at the Laboratory for Preparation and Computation of Nanomaterials (www.lpcn.ufpa.br), Federal University of Pará, Brazil.
